 <b>Update on Nutritional Recommendations for the Pediatric Patient</b>	
By Frank R. Greer	
Prevention of atopic disease with nutritional interventions early in life	27
Iron	29
Vitamin D	33
Lipid screening and the use of low-fat dairy products	35
Probiotics and prebiotics	36
References	37

## Immunization Update III

By Ayesha Mirza and Mobeen H. Rathore

Influenza vaccines	41
2009 (H1N1) novel influenza A	41
Seasonal influenza	49
Adolescent immunizations	50
Tetanus, diphtheria, and acellular pertussis containing vaccine: Tdap	50
Meningococcal vaccines	51
Human papilloma virus vaccines	53
Pediatric vaccines	55
Pneumococcal conjugate vaccines	55
Rotavirus vaccines	55
Other childhood combination vaccines on the horizon	56
Combined haemophilus influenzae type B-neisseria meningitides serogroups C and Y-tetanus toxoid conjugate vaccine	56
Changes in recommendations for vaccines used in special circumstances	57
International vaccine news	57
Summary	58

## The Human Parechoviruses: An Overview

By José R. Romero and Rangaraj Selvarangan

Historical background	65
Virology	66
Epidemiology	68
Clinical syndromes	70
Central nervous system infections	70
Meningitis	71
Acute flaccid paralysis	72
Encephalitis	73
Neonatal disease	73
Undifferentiated febrile illness	73
Hemorrhage-hepatitis syndrome	74
Necrotizing enterocolitis	74
Gastrointestinal disease	75
Respiratory disease	76
Sudden unexplained infant death	77
Miscellaneous clinical associations	77
Diagnosis	78
Nucleic acid amplification	78
Cell culture	79
Specimen selection and interpretation of results	80
Serology	80
Prevention and control	81
Summary	81
References	81

**Care of the Foster Child: A Primer for the Pediatrician**

By Claudia Wang, Susan B. Edelstein, Lori Waldinger,  
Caroline M. Lee, and Eraka Bath

Medical focus on the foster child	88
Environmental risk factors for the foster child	88
Postplacement comprehensive medical care	89
Communication skills and the foster child	92
Speech disorders	93
Language disorders	93
Screening for language delays	93
Inconsistent language stimulation and exposure	94
Abuse and neglect	95
Prenatal alcohol and drug exposure	96
Educational advocacy	97
Mental health care	100
Psychosocial issues	103
The Foster parent	105
Cultural sensitivity	106
Summary	106
References	106

**School-Based Health Centers: A Model for the Provision of Adolescent Primary Care**

By Steven G. Federico, Wanda Marshall, and Paul Melinkovich

Case study	113
School-based health centers	114
History	114
Models of care	115
Services	115
Collaboration	116
Financing	117
Quality initiatives	117
Outcomes	117
Denver school-based health centers: a case study	118
References	120

**The Past Decade in Pediatric Education: Progress, Concerns, and Questions**

By Kenneth B. Roberts

Societal factors with implications for medical education	123
Focus on patient safety	123
The quality improvement movement	127
Advances in technology	128
Recognition of a need for more physicians	131
The current generation	133
Issues within medical education	134
The ACGME Outcome Project	134

Assessment of performance	136
Faculty development and educational scholarship	138
Pediatric initiatives to improve education	140
Collaboration	143
Now and the future	145
Acknowledgments	145
References	146

## **Controversies Surrounding Pediatric Psychopharmacology**

By Robin Steinberg-Epstein, Teri Book, and Sharon B. Wigal

Empirically driven treatment models	155
Anxiety	155
Depression	156
Attention-deficit/hyperactivity disorder	156
Autism	158
Psychopharmacology	158
Selective serotonin reuptake inhibitors	158
Stimulants/stimulant alternatives	164
Stimulant alternatives	167
Antipsychotics	168
Summary	173
References	174

## **Management of Pediatric Intestinal Failure**

By Jeffrey J. Dehmer, Megan K. Fuller, and Michael A. Helmrich

Assessment of the child with intestinal failure	183
Feeding strategies	183
Predictors of outcome in intestinal failure	185
Other complications associated with intestinal failure	187
New concepts in medical and surgical management	189
Summary	191
References	192

## **Infantile Hypertrophic Pyloric Stenosis: Epidemiology, Genetics, and Clinical Update**

By Judith D. Ranells, Jane D. Carver, and Russell S. Kirby

Pathogenesis	195
Evaluation	196
Treatment/management	197
Epidemiology	199
Genetics	201
Environmental factors	202
Summary	203
References	204

## **rhGH Safety and Efficacy Update**

By Bradley S. Miller

Efficacy	209
Pediatric GHD	209
Chronic renal insufficiency before transplantation	212
Turner syndrome	214
Short stature from prader-willi syndrome	215
Small for gestational age	215
Idiopathic short stature	216
SHOX deficiency	218
Noonan syndrome	219
Safety	219
Short-term safety	221
Short-term risk of mortality	221
Mortality in prader-willi syndrome	222
Mortality in turner syndrome	223
Short-term risk of malignancy	223
Other Targeted safety events	227
Diabetes Mellitus	228
Intracranial Hypertension	228
Scoliosis	228
Pancreatitis	229
Adrenal insufficiency	229
Slipped capital femoral epiphysis	229
Chronic renal insufficiency after transplantation	230
Long-term safety	230
Future directions	233
References	233

## **Update on Precocious Puberty: Girls are Showing Signs of Puberty Earlier, but Most Do Not Require Treatment**

By Paul Kaplowitz

Review of normal puberty	243
Are girls maturing earlier? If so, how should we define when pubertal development is precocious?	224
Are boys maturing earlier than in the past and when should they be referred?	246
What can we say about why girls are starting puberty earlier?	247
Common variations of pubertal development	248
Premature adrenarche	248
Premature thelarche	250
Genital hair appearing in infancy	257
Premature menarche	251
Central precocious puberty	252
Gonadotropin-independent precocious puberty	255
Environmental exposures to sex steroids	256
Summary	256
References	257

## Update on Pediatric Epilepsy

By Agnes H. Chen

Classification of seizures and epilepsy	259
Classification of epilepsy	261
Approach to seizures and epilepsy	261
Antiepileptic drugs	264
Medication choice based on seizure type and syndrome	266
Medication choice based on potential toxicity	267
The newest antiepileptics	268
Infantile spasms	269
Example case in the management of pediatric epilepsy	270
Discussion	270
Status epilepticus	271
Nonmedication epilepsy treatment options	272
The ketogenic diet	272
Vagus nerve stimulator	273
Epilepsy surgery	274
Summary	274
References	275

## Hearing Loss and Cochlear Implantation in Children

By Patricia J. Yoon

Types of hearing impairment	277
The cochlear implant	278
Candidacy for implantation	281
Surgical and medical considerations	285
The implant procedure	286
After cochlear implant surgery	289
Bilateral implantation	290
Outcomes	291
Cost effectiveness and quality of life	292
Summary	293
Acknowledgments	293
References	293

## Neuroblastoma

By Nadja C. Colon and Dai H. Chung

Epidemiology	297
Clinical presentation	298
Classification and staging	299
Genomics	302
Diagnosis	303
Treatment	303
Current research milestones and proposed novel therapies	305
Retinoic acid	305

mTOR inhibitors	305
Aurora A kinase	306
TrkB inhibitors	306
Immunotherapy	306
Angiogenesis inhibitors	307
MDM2 and ODC1 as a MYCN targets	307
GRP receptor	309
Summary	309
Acknowledgments	309
References	309
