Introduction: Life Goes On: Health Care Systems, Complex Medical Conditions, and Newer Trends in Health Care: Post Pandemic	xix
Carol D. Berkowitz	
Health Systems Science	
Katherine M. Bartoletta and Stephanie R. Starr	
Health professions education requires a new approach	1
Gaps in United States health and the health care system	1
Existing and emerging pediatric health problems	2
Third science is needed to close current and future gaps in child health	3
Health systems science as the third science	3
Definition and framework	3
Systems citizenship	5
Systems thinking	5
Health care structures and processes	6
Pediatric medical home	8
Schools	8
Application in clinical practice	8
Population, public, and social determinants of health	9
Social determinants of health as part of structural competency	9
Clinical informatics and health technology: telehealth	10
Health care policy and economics	11
Health policy and health insurance that enable health	12
Payment system reform for children	12
Change agency, management, and advocacy	13
Advocacy	13
Summary	15
Clinics care points (evidence-based pearls and pitfalls for point of care)	15
Disclosure	16

When Less is More: The Role of Overdiagnosis and Overtreatment in Patient Safety

Audrey D. Kamzan and Elayna Ng

Introduction	22
Background	22
Definitions of overuse, overdiagnosis, and overtreatment	24
The scope of harm	26
Case study in overuse: neuroblastoma screening	26
Why do providers do more when less is best?	27
Culture of medicine	27
Clinician attitudes and beliefs	27
Practice environment	28
Patient factors and experiences	28
Culture of health care consumption	29
Publication bias	29
Culture of medical education	29
Industry influence	29
What can be done?	29
The Choosing Wisely campaign	29
Changes in institutional priorities	30
Patient-provider communication	31
Medical student and trainee education	31
Summary	32
Disclosure	32

Antibiotic Stewardship in Pediatrics

Kurlen S.E. Payton and Marissa A. Brunetti

Introduction	37
Consequences of antibiotic overuse	38
Microbiome	38
Link to later disease	38
Antibiotic resistance and economic impact	38
Antibiotic stewardship strategies and antibiotic stewardship programs	39
Neonates	39
Unique challenges in the newborn nursery	39
Full-term and late preterm infants in the neonatal intensive care unit	41
Challenges managing preterm infants in the neonatal intensive care unit	42
Adverse effects of antibiotics in preterm infants	42
Culture-negative sepsis	42
Antibiotic stewardship strategies in the nursery and neonatal intensive care unit	43
Sepsis calculator	43
Serial physical and clinical examinations	43
Biomarkers for evaluating sepsis in the nursery and neonatal intensive care unit	43
Guidelines and stewardship implementation for early onset sepsis in preterm infants	44

Pediatric intensive care unit	45
Tenets of antibiotic stewardship in the pediatric intensive care unit	45
Biomarkers for antibiotic stewardship in the pediatric intensive care unit	46
Outpatient antibiotic use	47
Emergency department	47
Factors contributing to antibiotic overuse in outpatient settings	47
Outpatient antibiotic stewardship interventions	48
Summary	49
Clinics care points	49

Balancing Autonomy and Protection in Pediatric Treatment and Research

Tiffany Chenneville, Kemesha Gabbidon, Stefanie Hornschuh, and Janan Dietrich

Introduction	56
Child protection versus child autonomy	56
Legal and ethical considerations	57
Informed consent	57
Privacy and confidentiality	59
Developmental considerations	60
Family considerations	61
Cultural considerations	61
Health equity and access considerations	62
Relevant ethical models	63
Goodness-of-fit ethical framework	63
The protectionâ autonomy model	63
Recommendations for balancing autonomy and protection in pediatric treatment and research	64
Best practices for informed consent and assent	64
Best practices for protecting confidentiality and disclosures	65
Summary	66
Clinics care points	67
Disclosure	67

Addressing Parental Adverse Childhood Experiences in the Pediatric Setting

Rupal C. Gupta, Kimberly A. Randell, and M. Denise Dowd

Introduction	71
Parental adverse childhood experiences and child health outcomes	72
Early experiences and the impact of parental adverse childhood experiences on parenting behaviors	73
Intergenerational transmission of adverse childhood experiences	73
Framework for addressing parental adverse childhood experiences in pediatric care settings	76
Recognition of parental adverse childhood experiences in clinical settings	76
The challenges of screening	77
Implications for practice	79

Universal interventions	79
Targeted prevention strategies for high-risk families	82
Resources	83
Summary	84
Acknowledgments	84
Disclosure	84

Caring for Medically Complex Children in the Outpatient Setting

Michelle A. Blanco, Carol M. Lilly, Brooke C. Bavinger,
Sara Garcia, and Michelle P. Hojnicky

Introduction	89
Identifying complex patients	90
Scoring of complexity	91
Benefits of identifying complex patients	92
Complex care clinic models	92
Medical home model	93
Consultative model	93
Episode-based model	94
Challenges of delivering and managing complex care	94
Finances	94
Geographic access	95
Infrastructure and care coordination	95
Workforce readiness	96
Patient and family support	96
Home health care	96
Medical day care	96
Pediatric palliative care	97
Peer-to-peer support groups	97
Transitions in care	98
Hospital discharge	98
Transitions in development	99
Transition to adult care	99
Summary	100
Clinics care points	100

Postoperative Management of Pediatric Patients

Melinda Murphy, Patricia O'Brien, and Matthew Gates

Objectives	103
Introduction	103
Role of the pediatric hospitalist	104
Disadvantages	105
Communication	105
Family-centered rounds	105
Documentation	106
Planning for discharge	106
Routine postsurgical management considerations	107
Respiratory	107

Venous thromboembolism prophylaxis	109
Postoperative pain control	110
Complications	113
Special populations	114
Scoliosis and spinal fusion	114
Summary	115
Clinics care points	116
Disclosure	116

Inflammatory Bowel Disease in Children and Adolescents

Nathan S. Rubalcava and Samir K. Gadepalli

Introduction	121
Epidemiology	121
Pathogenesis	122
Spectrum of disease	122
Diagnosis	122
Presentation	122
Laboratory investigations	125
Imaging	126
Endoscopic findings	126
Management	127
Goals of management	127
Medical management	128
Surgical management (Crohn's disease)	129
Surgical management (ulcerative colitis)	132
Complications	134
Outcomes	135
Nutrition and growth	135
Psychosocial	136
Colon cancer	136
Future Directions	136
Exclusive enteral nutrition	136
Collaborative care networks	136
Transition from childhood to adulthood	137
Fecal microbiota transplantation	137
Summary	137
Clinics care points	137
Disclosure	138

Updates in Juvenile Idiopathic Arthritis

Deborah McCurdy and Miriam Parsa

Introduction	143
Classification	144
Juvenile and prevalence	145
Genetics	145
Juvenile idiopathic arthritis: categories	145
Oligoarticular juvenile idiopathic arthritis	145

Polyarticular juvenile idiopathic arthritis	150
Systemic juvenile idiopathic arthritis	154
Juvenile psoriatic arthritis	157
Enthesitis-related arthritis and juvenile ankylosing spondylitis	157
Undifferentiated	158
Biologic therapies	158
Anti-tumor necrosis factor	158
Diet, antibiotics, and autoimmunity	162
Bone health in children with juvenile idiopathic arthritis	163
Summary	165
Clinics care points	165

Vitamin D Update in the Pediatric Population

Lindsey A. Warner, Rachel L. Sewell, and Nina S. Ma

Introduction	171
Definition of hypovitaminosis D	173
Pediatric at-risk groups	173
Vitamin D assays	174
Vitamin D and clinical outcomes	175
Fractures	175
Bone imaging	180
Current supplementation guidelines	189
Infants	189
Children and adolescents	189
Extraskelatal effects of vitamin D	190
Summary	190
Acknowledgments	190
Disclosure	190

Pediatric Breast Masses: An Overview of the Subtypes, Workup, Imaging, and Management

Maria E. Knaus and Julia E. Grabowski

Introduction	195
The spectrum of pediatric breast masses	196
Cysts	196
Neonatal lesions	196
Male lesions	197
Common benign lesions	197
Rare benign lesions	198
Malignant lesions	199
Workup	201
History and physical examination	201
Imaging	202
Management of a pediatric breast mass	203
Summary	206
Clinics care points	206
Disclosure	206

Pituitary Tumors in Children

Craig A. Alter, Karuna V. Shekdar, and Laurie E. Cohen

Introduction	211
Pituitary imaging	212
Normal MRI appearance of the pituitary gland	212
Pituitary cysts	215
Pituitary tumors	216
Craniopharyngioma	216
Pituitary adenoma	217
Hypothalamic hamartoma	218
Optic pathway glioma	219
Pituitary stalk thickening	219
Other structural nontumorous findings in the pituitary and hypothalamic region	220
Ectopic posterior pituitary	220
Optic nerve hypoplasia, hypopituitarism, and septo-optic dysplasia	220
Empty sella syndrome	220
Evaluation of the child with a pituitary mass	220
Physical examination	220
Testing	221
Treatment	222
Pituitary tumor and cyst treatment	222
Hormone replacement	222
Summary	223
Clinics care points	224
Disclosure	224

Adrenal Tumors in Childhood

John S. Fuqua

Introduction	227
Embryology and early development of the adrenal gland	228
Adrenocortical tumors	228
Presentation	228
Molecular pathogenesis and association with malignancy syndromes	230
Grading and staging of adrenocortical tumors	231
Treatment	233
Primary bilateral adrenal hyperplasias	233
Primary pigmented nodular adrenal disease	234
Isolated micronodular adrenocortical disease	234
Primary bilateral macronodular adrenal hyperplasia	234
Pheochromocytoma/paraganglioma	235
Presentation	235
Evaluation	235
Molecular pathogenesis	239
Treatment	239
Outcomes	240
Disclosure	241

Advances in the Surgical Management of Esophageal Atresia

Alexis N. Bowder and Dave R. Lal

Introduction	245
Incidence	245
Cause/pathogenesis	246
Prenatal and postnatal diagnosis	246
Classification	248
Preoperative work-up	250
Preoperative management	250
Emergent maneuvers in the preoperative period	251
Surgical management	251
Open repair	251
Surgical approach in patients with a right-sided aortic arch	252
Safety of thoracoscopic repair of esophageal atresia/ tracheoesophageal fistula	252
Surgical management of long-gap esophageal atresia	253
Complications/outcomes	254
Summary	256
Clinics care points	256
Disclosure	257

Trends in Pediatric Recreational Drug Use and Ingestions

Raymen R. Assaf and Kelly D. Young

Introduction	261
Clinical approach	263
General history	263
Workup	264
Treatment	264
Current toxidromes	264
Nicotine-containing electronic cigarettes	264
Marijuana: Weed, wax, and edibles	265
Synthetic cannabinoids	267
Opioids	268
Prescription drug misuse	270
Microdose psychedelics	271
Inhalants	272
Dextromethorphan	273
Summary	274
Clinics care points	274
